

Dear parents and carers,

We are taking celebrating British Science Week again this year by taking part in a wide range of exciting Science themed activities across school!

We have had an online talk from the company Eggucator and we can't wait for the arrival of our baby chicks which are due to hatch in the incubator soon. We will post pictures when they arrive.

St George's Science Fair Friday 25th March

Children have asked us to hold a science fair in school as an opportunity to showcase a science activity they have tried at home. If you would like to try your hand at an activity at home with your child, we would love to see their ideas and work in school. Children are welcome to bring in items or photographs to show in the fair if they wish of the activity they tried.

I've included a link below to a selection of easy activities from The Royal Institution that can be tried with an adult using items you will be able to find around the home but please feel free to try your own ideas too!

Activities and resources

Try your hand at one of many at home science experiments or explore our Ri Masterclass workshop resources.

We will look forward to seeing children's ideas.

Best Wishes,

Mrs Davison
