

## Safer Internet Day 2019

Learning about staying safe online is an important component of our curriculum at St George's. As always, we took part in Safer Internet Day which was held on 5<sup>TH</sup> February 2019. This year's theme was 'Together for a better internet.'

We are so proud of our Year 5 and 6 children who led our pupil training this year! Children in each class enjoyed fun, interactive presentations from small teams of pupils. What a great opportunity for children to learn from older children in school who were able to share knowledge and advice in a non-threatening, accessible way!

Sessions were lively and friendly with the emphasis on audience participation, from our very youngest pupils in Early Years, through to our junior children. However key messages about how to keep personal information safe and appropriate ways to treat others online were central to the presentations.

Thank you Year 5 and 6 children for sharing your expertise.
